COIL ON PLUG TUNE-UP KITS

Many newer vehicles are using coil on plug ignition in lieu of traditional coil and ignition wire systems. The spark plug connector spring and boots are starting to fail. Boots are prone to burn-through and arching. Poor fitting springs sometimes weld themselves onto the plug or coil making removal difficult without stretching the springs completely out of shape when changing the spark plugs or removing the coil (Ford).

Until now, the only alternative was to replace the complete coil assembly which could cost you \$50-\$100 per coil. For example, a 6 cylinder has 6 coils.

Micro-Tech Automotive Industries is happy to announce the immediate availability of Coil-on-Plug Tune-up Kits that include Spark Plug boots, and contact springs in sets of 4 – 6 – 8 & 10 cylinders.

72-1697 Shown

The following is a partial listing of currently catalogued kits.
View catalog applications for additional listings.

PART #	APPLICATION	ENGINE	YEAR	CYLINDERS PER KIT
72-4QD4	GM QUAD FOUR	2.3L, 2.4L	02-87	4
