COPYRIGHT 2008 MICRO-TECH AUTOMOTIVE INDUSTRIES

THIS MINI CATALOG HAS BEEN DESIGNED TO GIVE PROSPECTIVE CUSTOMERS A QUICK OVERVIEW OF A FEW OF OUR UNIQUE “NICHE” ITEMS AND COMMODITY PRICED PRODUCTS.

ADDITIONALLY MICRO-TECH MANUFACTURES A FULL LINE OF IGNITION WIRE, TUNE-UP KITS, ECMS (ELECTRONIC CONTROL MODULES), MASS AIR FLOW SENSORS (MAF), AND GRANATELLI / MPG PLUS IGNITION PRODUCTS.

SEE BACK PAGE FOR A FULL LISTING OF AVAILABLE CATALOGS. ELECTRONIC CATALOGING IS ALSO AVAILABLE USING TRIAD / ACTIVANT AND WRENCHHEAD.

NEW ! NEW ! NEW ! NEW ! NEW ! NEW !

An Industry First!

FORGET EVERYTHING YOU'VE EVER HEARD ABOUT PLUG WIRE!!!

- **"0" Ohm Resistance**
- **Solid Core Wire**
- **OBD-II Safe**
- **8mm – 500° Silicone Jacket/boots**
- **Stainless Spark Plug Terminals**
- **Made in USA**

NO OTHER WIRE MANUFACTURER CAN MAKE THESE CLAIMS!

Our Hardcore Series wire set features an unheard of near "0" ohms* resistance per foot. Our patented technology has less RFI/EMI interference than an O.E. set and allows full coil power to reach the spark plug. Numerous Dyno* tests on a variety of vehicles have shown an increase of as much as 15 HP and 17 lbs. of torque at the rear wheels (Dyno data available upon request). Easy installation, custom tailored fit, and OBD-II safe. Available for most domestic/import/truck applications.

*Car Craft Magazine June 2005 / Chevy Hi-Performance Magazine September 2005

SMOKE & MIRRORS

We have all heard about the magic pill in the gas tank that will get you 50 MPG, the secret formulas and silver bullets that increase horsepower and gas mileage. Experience tells us that those outrageous claims are bogus and mostly smoke and mirrors. However, every so often something comes along that's real and this is one of those times. There are no smoke and mirrors here! "0" Ohm Solid Core Ignition wire that is OBD-II safe and can be used on any computer controlled vehicle resulting in easier starts, better pick-up, increased rear wheel horsepower, increased torque, and/or fuel economy.

PERFORMANCE IGNITION WIRE FACTS

Did you know that most racers replace their ignition wire at least once a year because of core deterioration?

- **Our "0" OHM Stainless Solid Core wire may be the last set you will ever have to buy, and has a limited lifetime warranty.**

Did you know that a typical performance wire set with 50 ohms per foot rating does not supply the same spark intensity to each cylinder? That's because a 2' wire has 100 ohms of resistance and a 4' wire has 200 ohms. The longer the wire, the more resistance and less power reaches the spark plug.

- **Our "0" Ohm Solid Core wire supplies full coil power and spark intensity in equal amount to all cylinders regardless of wire length. It's like blue printing the ignition spark to each cylinder!**

Did you know that the performance wire industry does not offer any upgrades for coil on plug ignition?

- **We have applied the same "0" ohm technology to coil on plug ignition and offer connector kits for most performance coil on plug vehicles.**

**CALL MICRO-TECH AUTOMOTIVE INDUSTRIES

HD HI-PERFORMANCE COIL-ON-PLUG CONNECTOR SETS

AVAILABLE FOR 2V, 3V, 4V AND 10 CYL ENGINES

**Ford GT, 4.6L Mustang GT, Shelby GT 500
4.6L Ford Crown Vic. Marquis, Town Car
5.4L Truck-Van-SUV
(2008-1997)**

A NEW Answer to Frequent Coil Replacements

Patented

The Coil-on-Plug ignition on the 4.6L and 5.4L Ford engines have many problems. The majority of coil replacements has to do with the design of the connector boots and springs. Boots are prone to burn-through and arcing. Poor fitting springs sometimes weld themselves onto the plug or coil making removal difficult without stretching the springs completely out of shape when changing the spark plugs or removing the coil.

Part #'s

28-1697F (2V)

28-1812F (3V)

Our industry first coil-on-plug connector sets virtually eliminate these kinds of problems and will improve performance and fuel

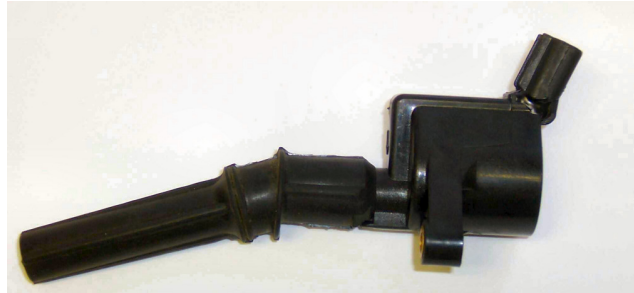

FEATURES

- 500° Silicone Boots (Prevents burn-through and arcing)
- Solid Stainless connector (Eliminates spring)
- Snap lock connectors (Positive coil/plug connection)
- Near "0" Ohm resistance (Less than OE)
- Up to 25% more power to plug (Improves performance and increases mpg up to 15%)
- EMI/RFI protection ring (Less interference than OE specifications)
- Limited Lifetime connector warranty
- **Additional applications available for GM & Chrysler**

Made In USA

NEW FORD "COIL ON PLUG" ASSEMBLY (2V ENGINES)

DG-508N

Jobber Price \$27.90

**FOR EVEN BETTER PRICING
SEE OUR
VOLUME PRICE SCHEDULE!**

The Motorcraft Coil # DG-508 is the hottest coil in the industry. This one coil fits all Ford Passenger, Truck, Van, and SUV vehicles with 4.6L, 5.4L, and 6.8L (2v) engines ranging from model year 1997-2008. They have a high failure rate and have been frequently on backorder by the industry due to the high order demand. Industry Jobber price averages near \$50.00 each with a \$95.00 list cost. Our package is multi-labeled with the Motorcraft, SMP, BWD, KEM, and Wells part numbers. Your choice of predominate number. One-year unlimited mileage warranty.

Micro-Tech's DG-508N coils are manufactured to O.E. specifications with the O.E. boot and spring already installed. Each coil carries a 1-year unlimited mileage warranty, imported. ♦ Cab companies and municipal fleets are big users of this product.

DG-511N 2008/2004 (3V) & DG-512N 2008/1999 (4V)

Now Available!

COIL ON PLUG TUNE-UP KITS

Many newer vehicles are using coil on plug ignition in lieu of traditional coil and ignition wire systems. The spark plug connector spring and boots are starting to fail. Contact springs are corroding and in some cases are being stretched out of shape when the spark plugs are changed. Boots are developing cracks and pin holes allowing spark leak and arcing.

Until now, the only alternative was to replace the complete coil assembly which could cost you \$50-\$95 per coil. For example, a 6 cylinder has 6 coils.

Micro-Tech Automotive Industries is happy to announce the immediate availability of Coil-on-Plug Tune-up Kits that include Spark Plug boots, contact springs, and dielectric gel pack in sets of 4 – 6 – 8 & 10 cylinders

The following is a listing of currently available kits.

(MADE IN USA)

<u>PART #</u>	<u>APPLICATION</u>	<u>ENGINE</u>	<u>YEAR</u>	<u>CYLINDERS PER KIT</u>

NEW GM HI-PERFORMANCE MAF SENSORS WITH ADJUSTABLE CALIBRATION

Finally, a replacement Mass Air Flow Sensor that has **HIGHER RELIABILITY** than the original equipment unit. It has been **PATENTED** by Micro-Tech Automotive. This unit has up to 30% **HIGHER AIR FLOW RATE** than the original equipment unit and you don't have to tear out the screens or grind down any parts inside! Our unit is the only unit available that features **ADJUSTABLE CALIBRATION**. If you have a highly modified engine, then this is what you have been waiting for! High lift cams, big valves and intake system changes that increase the volumetric efficiency of your engine create the need for an Air Flow Sensor that can be tuned to meet the needs that your combination requires.

49-1018A

(5.7L CORVETTE, CAMARO Z-28, FIREBIRD, TRANS AM)

49-1022A

(3.8L TURBO CHARGED BUICK ENGINES)

This unit fits all applications that use 1985-1989 5.0L and 5.7L Chevrolet engines that have the Tuned Port Injection Fuel System installed requiring a Mass Air Flow Sensor. It is a **DIRECT REPLACEMENT** for the original part. No modifications of the vehicle are required to install the unit. Our unit replaces the following OE part numbers: 0280213002, 0280213004, 0280213009, 10055877, 14081243, 14094712.

The applications for this MAF are as follows:

85-88 CHEVROLET CAMARO 5.0L
85-89 PONTIAC FIREBIRD 5.0L
85-89 PONTIAC TRANS AM 5.0L
87-89 CHEVROLET CAMARO 5.7L
85-89 CHEVROLET CORVETTE 5.7L
87-89 PONTIAC FIREBIRD 5.7L
87-89 PONTIAC TRANS AM 5.7L

This unit fits all applications that use 1984-1989 3.8L Turbo-charged Buick engines that have the Tuned Port Injection Fuel System installed requiring a Mass Air Flow Sensor. It is a **DIRECT REPLACEMENT** for the original part. No modifications of the vehicle are required to install the unit. Our unit replaces the following OE part numbers: 25007651, 25007653, 25007861, and 25007866.

The applications for this MAF are as follows:

84 -87 BUICK REGAL 3.8L
84-85 BUICK RIVIERA 3.8L
89 PONTIAC TRANS AM 3.8L
89 PONTIAC FIREBIRD 3.8L
86-87 BUICK GRAND NATIONAL 3.8L

REMANUFACTURED INJECTOR DRIVE MODULE (IDM)

58-5903
58-5904

The INJECTOR DRIVE MODULE (IDM) is found on all 1994-2003 Ford Truck applications with the 7.3L diesel engine. These units operate the injectors at 115 Volts DC and are frequently the source of the problem in a "No start" condition. Until now, these units were only available through the dealer ship parts counter at prices exceeding \$800.00! Micro-Tech Automotive is once again the first to offer remanufactured IDMs to the aftermarket with units available for immediate shipment

Just 2 Micro-Tech part numbers replaces all these OE part numbers:

F5TF12B599AA	58-5903
F5TF12B599AB	58-5903
F6TF12B599AA	58-5903
F7TF12B599AA	58-5903
F7TF12B599AB	58-5903

F7TF12B599AC	58-5903

Hassle-Free White-face Gauges!

Micro-Tech has a new solution.

We offer an affordable instrument cluster with white-faced gauges already installed.

Our no-risk ready to drop in units start at \$199.95 plus a refundable core charge. Units with mechanical-style odometers are reset to zero miles and include a doorjamb disclaimer. Units with an electronic odometer must be sent in on a repair and return basis because existing mileage is permanent. Over 250 applications are available. Speedometer and tachometer calibrated for accuracy. 1-year unlimited mileage warranty.

What are you waiting for? Get your sporty white-faced gauges without the headaches. Call today for pricing and availability.

MORE GREAT PRODUCTS FROM MICRO-TECH!

Two instant answers to more mass air flow profits!

AVAILABLE NOW.....

NEW OR REBUILT!

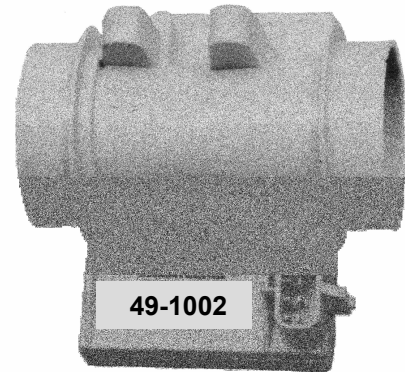

MADE IN USA

Once again, Micro-Tech, the true pioneer in automotive electronics, has delivered! These superior MAF units are now available either new, without core charges or core handling or rebuilt with a modest core deposit. Our Patented, unique design allows a consolidation and a part number reduction of over 60% on these hard to find units.

That alone saves you time, money, and space.

Our state-of-the-art circuitry and computerized calibration techniques assure you and your customer of the same consistent, superior quality you've been used to from Micro-Tech.

We guarantee it whether your preference is a new or rebuilt unit! Pick up the phone and give us a toll-free call --- you'll receive a fast, courteous, intelligent answer to your mass air flow questions-and you'll fill your customers' needs at substantial savings.
